BRIEF STATEMENT

CBS Roscommon identifies and serves the needs of students and puts in place appropriate resources, curricula, programmes and methodologies to enable everyone to achieve his potential. They believe in having high expectations for all of our students. Students consistently perform better when they know that their teachers and parents believe in them. All Junior Certificate and Leaving Certificate subjects are taught at both Higher and Ordinary Level.

Students are always encouraged to aim high and achieve their personal best. The school has an excellent academic reputation in state examinations, and a high percentage of their students' progress to third level education.

CBS Roscommon works closely with appropriate educational bodies to ensure that they provide the best possible education for all students, including those who require learning support.

Where students have special educational needs, there is a proactive SEN department in the school who work to support students in every possible way. Resource and learning support is determined following a formal cognitive assessment which is undertaken by all students in the month of May, prior to their entry to the school. There is a wide range of resources available to support students which utilise multiple intelligences, and help bring each student's learning experience to life.

FACILITIES
